

Healthy Development and Resiliency Study

This research study is aimed at **improving the well-being of infants and toddlers** who may be facing numerous challenges in life. We are working to identify biological signs of overcoming obstacles to these life challenges in very young children.

Who are we looking for?

Moms who have recently given birth (within the last 3 months) and their infant child.

Participation can last up to 24 months.

What would you have to do?

You

- Complete questionnaires about you and your infant
- Interact with your infant

You will be compensated for your time with a \$20 gift card at each visit. Free parking will be available.

Your Child

- Undergo play-based developmental assessments
- Interact with you
- Watch some videos while we monitor their eye movements
